

GRAFF-O-GEL

Biodegradable graffiti remover - Ready to use

DESCRIPTION

GRAFF-O-GEL is a gel product specially designed to effectively remove permanent markers and various paints from all porous, painted, stone and concrete surfaces. It contains solvents and non-foaming emulsifiers for easy rinsing. It is fully biodegradable and non-toxic. **GRAFF-O-GEL** does not release volatile organic compounds and is non-flammable.

AVANTAGES

1. Safe for the user.
2. It is biodegradable, VOC-free and environmentally friendly.
3. Not flammable or combustible.
4. Pleasant scent.
5. High performance on all types of graffiti. Safe for fabrics.
6. Short contact time.
7. Gel formula ideal for vertical or porous surfaces.
8. Compliant with ASTM E standard

TECHNICAL DATA

pH (as is)	Not applicable
Specific gravity @ 20°C	1.020-1.025
Viscosity	Viscosity greater than 10,000 cP@ 20°C
Appearance	Yellowish liquid
Odour.....	Perfumed
Solubility in water.....	Complete
Auto-ignition temperture.....	None
Flash point (TCC).....	Above 93.3°C
Freeze/thaw stability	Below -20°C
Boiling point	205°C

INSTRUCTIONS

Technique: Using a cloth, test the product on a small area to determine the solidity of the surface and the ideal contact time. Do not use if the surface appears altered after the test application. Spray the product onto the surface to be cleaned and leave it work. Do not allow the product to dry. Check the product effectiveness using a cloth. Rinse well to remove all the product from the surface.

Repeat, if necessary, on a dry surface.

Operating time/contact time: 1 to 10 minutes (depending on the surface solidity) Never allow the product to dry on the surface.

Mechanical action: Scrub if necessary. Caution: may damage paintwork or certain surfaces close to the surface to be treated.

Rinsing: Rinse with cold water using a damp scouring pad, cloth or high-pressure cleaner.

STORAGE: Keep containers tightly closed in a dry, well-ventilated place.
