

TECHNICAL SHEET

GRAFF-O-GONE

Eco-friendly. Biodegradable Graffiti Remover

DESCRIPTION

GRAFF-O-GONE is a product specially designed to effectively remove permanent markers and various paints from all smooth surfaces, including painted surfaces, stone, and concrete. It is composed of non-foaming solvents and emulsifiers for easier rinsing. It is completely biodegradable and non-toxic. GRAFF-O-GONE contains no caustic or acidic ingredients, does not release any volatile organic compounds, and is non-flammable.

ADVANTAGES

1. Safe for the user.
2. It is biodegradable, without phosphate and environmentally friendly.
3. Non-flammable or combustible. Non-corrosive
4. Pleasant scent
5. High performance on all types of graffiti and surfaces
6. Safe for fabrics.
7. Short contact time.
8. Compliant with ASTM E standard

TECHNICAL DATA

pH (as is)	non applicable
Specific gravity (20°C)	1.020 - 1.025
Viscosity	inferior to 5 cP @ 20°C
Appearance	Pale yellow liquid
Odour	perfumed
Water Solubility	Complete
Flash point (TCC)	More than 93.3°C
Freezing point	Less than -20°C
Boiling point	205°C

HOW TO USE

Technique: Using a cloth, test the product on a small area to determine surface strength and ideal contact time. Do not use if the surface appears altered after the test application. Spray the product onto the surface to be cleaned and leave to work. Do not allow product to dry. Check product effectiveness with a cloth. Rinse thoroughly to remove all product from the surface.

Repeat if necessary, on a dry surface.

Operating time/contact time: 1 to 10 min (depending on surface and strength) Never allow product to dry on surface.

Mechanical action: Scrub if necessary. Caution: may damage paint or other surfaces close to the surface to be treated.

Rinsing: Rinse with cold water, using a damp scouring pad, cloth or high-pressure cleaner.

STORAGE: Keep containers tightly closed in a dry, well-ventilated place.
